The proposed project consists of the reconstruction and widening of FM 663 from FM 875 to US 287, for approximately 3.5 miles in Ellis County, Texas. The proposed improvements consist of two (ultimate three) 12-foot-wide lanes in each direction divided by a raised median. A shared-use path on the southbound side and a sidewalk on the northbound side are proposed. The project would also include turn-lanes and intersection improvements at side and cross streets. The proposed right of way width varies from approximately 125 to 185 feet.

The proposed project would, subject to final design considerations, require additional right of way and potentially displace residential and commercial structures. Relocation assistance is available for displaced persons and businesses. Information about the TxDOT Relocation Assistance Program and services and benefits for those displaced and other affected property owners can be obtained by calling the TxDOT Dallas District Right of Way office at (214) 320-6675 or by visiting the project website.

The proposed project may involve construction in wetlands. Any environmental documentation or studies, any maps and drawings showing the project location and design, tentative construction schedules, and other information regarding the proposed project are on file and available for inspection Monday through Friday by appointment between the hours of 8 a.m. and 4 p.m. at the TxDOT Dallas District office at 4777 East Highway 80, Mesquite, Texas 75150. Please call (214) 320-6244 to make an appointment. Project materials are also available online at the project website. These materials will also be available in hard copy form for review at the in-person option.

If you need an interpreter or document translator because English is not your primary language or you have difficulty communicating effectively in English, one will be provided to you.
